

Tariffs for electric supply – valid from 1.1.2008

Electricity products (low voltage clients)					
	Energy VAT 0	Transmission VAT 0	Total price ¹⁾ VAT 0	Total price ¹⁾ VAT 22 %	
*)HOMEplus GENERAL ELECTRICITY					
fixed charge (flat rate metering)	2,87	1,64	4,51	5,50	euro/month
energy rate	5,33	2,05	7,38	9,00	c/kWh
*)HOMEplus NIGHT ELECTRICITY					
fixed charge (two-rate metering)	2,87	5,86	8,73	10,65	euro/month
daytime energy	5,33	2,05	7,38	9,00	c/kWh
nighttime energy	4,43	0,98	5,41	6,60	c/kWh
*)HOMEplus SEASONAL ELECTRICITY					
fixed charge (two-rate metering)	2,87	5,86	8,73	10,65	euro/month
energy, winter weekdays	5,49	3,89	9,38	11,44	c/kWh
energy, other times	4,67	1,56	6,23	7,60	c/kWh
***)HOMEplus WEEKEND ELECTRICITY					
fixed charge (two-rate metering)	2,87	5,86	8,73	10,65	euro/month
daytime energy from Monday to Friday	5,49	3,15	8,64	10,54	c/kWh
nighttime energy and from Saturday to Sunday	4,67	1,31	5,98	7,30	c/kWh
<p>HOMEplus GENERAL ELECTRICITY (KOTIplus YLEISSÄHKÖ) is the most common electricity product. The same energy rate is valid throughout the day. It is suitable for households and for small and medium sized companies, whose annual electricity consumption is relatively low (less than 10 000 kWh per year). General electricity is usually the best alternative for households with no electric heating.</p> <p>HOMEplus NIGHT ELECTRICITY (KOTIplus YÖSÄHKÖ) is the most popular alternative among families, who live in detached houses with electric heating. It is also suitable for business premises and small industry, whose electric consumption is mostly concentrated on night-time. The price of the electricity is lower between 22 and 7 at night (standard time). Night electricity is recommendable when electric consumption is more than 10 000 kWh annually.</p> <p>HOMEplus WEEKEND ELECTRICITY (KOTIplus VIIKONLOPPUSÄHKÖ) suits for families who live in detached houses with electric heating, and whose electric consumption is concentrated to weekends. The lower pricing is applied on weekends from Saturday to Sunday throughout the day and on weekdays at nights from 22 to 7 (standard time). It is advisable and economical to concentrate your household work and sauna evenings to weekends with HOMEplus weekend electricity.</p> <p>HOMEplus SEASONAL ELECTRICITY (KOTIplus KAUSISÄHKÖ). The time of the year and the time of the day affects on the price of the seasonal electricity. Wintertime rates are applied from the beginning of November until the end of March on weekdays at 7 - 22 (standard time). Electricity rates are lowest in wintertime at nights, on Sundays and round the clock in the summertime from the beginning of April until the end of October. Seasonal electricity is the right choice when electric consumption is relatively high and occurs mainly in summertime and in winter nights.</p>					
*) Main fuse at max. 200 A.					
**) Main fuse at max 63 A. No longer available, no new clients.					

Electricity taxes

Total prices in the price list exclude electricity taxes collected by the state. In addition to total prices electricity taxes are charged on the bill.

Electricity tax 1.1.2008:	Tax class I	0,883 c/kWh (VAT 0)	1,0773 c/kWh (VAT 22 %)
Electricity tax 1.1.2008	Tax class II	0,263 c/kWh (VAT 0)	0,3209 c/kWh (VAT 22 %)

Industry and professional green house cultivation are entitled to a tax class II after delivering a certificate to a network company. Further information on taxes available at Turku Energia customer service department, address Linnankatu 65.

1) Total price includes electrical energy (electricity sales price) and electricity transmission. Total price excludes electricity taxes collected by the state.

Electricity products for temporary electricity transmission					
	Energy VAT 0	Trans- mission VAT 0	Total price ¹⁾ VAT 0	Total price ¹⁾ VAT 22 %	
*) TEMPORARY ELECTRICITY, LOW VOLTAGE					
fixed charge (flat rate metering)	2,87	3,40	5,82	7,65	euro/month
energy rate	5,33	4,10	9,43	11,50	c/kWh
TEMPORARY ELECTRICITY, HIGH VOLTAGE					
fixed charge (effect metering)	10,00	409,84	419,84	512,20	euro/month
energy rate	5,80	1,89	7,69	9,38	c/kWh

1) Total price including electricity energy (electricity sales price) and electricity transmission. Total price excludes electricity taxes collected by the state (see previous page).

Service charges

Electricity invoices _____	0800 02500		
Connection charges _____	(02) 2628 401		

Useful information:

ENTERING INTO A CONTRACT FOR ELECTRIC SUPPLY When you are moving from one apartment to another do not forget to make a contract for electric supply with Turku Energia. This guarantees you an uninterrupted electric supply. Just give us a call on customer service department, telephone 0800-02500. All deals made by phone will be confirmed with a written contract that will be mailed to you. In case you are building a new detached house that is not connected to Turku Energia distribution network you will need a connection contract. Therefore please contact us no less than two months before moving in so that there will be enough time to build a coupling cable.

WOULD YOU LIKE TO CHANGE A PRODUCT? In case you want to change from one electricity product to another just give us a call on customer service. The chosen new product will be applied for a minimum one year.

INVOICING Turku Energia invoices households 4, 6 or 12 times a year according to the clients wishes (summer cottages once a year). The fixed charge of the month in question and electrical energy, based on estimated energy consumption, are charged on the invoice. The client's actual electric consumption is ascertained once a year by reading the meter. After ascertaining the electric consumption the client will receive a countervailing invoice where confirmed energy charges are credited.

DIRECT DEBITING It is easy to pay electricity invoices by making a direct debiting contract with your bank. You can also pay your bill directly to Turku Energia customer service on address Linnankatu 65.

FOR MORE INFORMATION on electric consumption, please call (02) 2628 400.

Selling conditions for electricity price list

- The electricity products (price setting alternatives for electric supply) in the price list refers to the clients who are situated on that area where Turku Energia is responsible for electric supply, and whose main fuse is at maximum 63 amperes. A complete price list including also alternatives for relatively big electric consumers and electricity transmission alternatives are available in Turku Energia on customer service department on address Linnankatu 65.
- A client may select whatever electricity product considering however the restrictions mentioned in these selling conditions. After chosen an electricity product it will be applied for one year at a minimum.
- Nighttime is at 22 - 07 (10 pm - 7 am) standard time in all products where different energy prices are applied for day and night energy (NIGHT ELECTRICITY, WEEKEND ELECTRICITY, SEASONAL ELECTRICITY).
- In WEEKEND ELECTRICITY daytime energy is applied on weekdays from Monday to Friday at 7 - 22 o'clock (standard time) and nighttime energy from Saturday to Sunday round the clock and on weekdays at nights from 22 to 7 (standard time). The main fuse on the consumption site may be at max. 63 amperes.
WEEKEND ELECTRICITY product will no longer be available, and therefore no new clients will be taken.
- In SEASONAL ELECTRICITY winter weekdays comprises Monday to Saturday from 7 to 22 o'clock during period 1st November - 31st March.
- The fixed charge for transmission products includes charge on metering equipment. The charge covers the service and regular maintenance of the necessary metering equipment, that is needed for metering the electricity consumption. In HOMEplus GENERAL ELECTRICITY product a flat rate metering is included; its share of the fixed charge on the transmission is 0,82 euros. HOMEplus NIGHT ELECTRICITY, WEEKEND ELECTRICITY and SEASONAL ELECTRICITY products include two-rate metering, whose share of the fixed charge on the transmission is 2,26 euros. If other metering equipment is installed in the electricity consumption site, and whose service is not included in the fixed charge of the transmission product, there will be a separate metering charge accordingly to a price list for metering. This charge covers the service of these metering equipment.
- Changing from one alternative to another requires such metering equipment installed on the consumption site that enable measuring variables, which are needed as basis for invoicing. If changing from one alternative to another acquires changes in metering equipment, the installation of the equipment will be charged accordingly to the metering charge presented on the separate price list for metering.
- If a client has no valid contract for electric supply with Turku Energia Electricity Sales or any other dealer, the local occupier of the distribution network is forced to interrupt electric supply to the electric consumption site in question. The client may maintain the electric connection without a valid electric supply contract by paying the maintenance charges in accordance to a separate price list for connection maintenance. Electricity can be supplied for temporary use (eg. building sites) with no a valid contract for a maximum two years. In such cases a particular price setting on temporary electricity is applied.
- When starting the electric supply or other single operations, these operations are charged accordingly to the chapter SERVICE CHARGES on this price list.
- In addition to these selling conditions the electricity sales conditions of Turku Energia are applied, unless any other written contract is available.
- The rated low voltage network is 230 V.
